

ADVANCED INFORMATION AE308

ACOUSTIC ENERGY
for the love of music

The AE308 is an all-new subwoofer from Acoustic Energy.

Designed to compliment and integrate seamlessly with the other models in the 300 Series, the 308 offers prodigious performance in both Hi-Fi and AV implementations; making use of a new 500 Watt (RMS) amplifier mated to a 12" high-excursion doped and stiffened pulp-fibre driver, the 308 also features DSP modes to tailor performance perfectly to desired usage, a first for AE.

In Music mode the 308 will perform in a balanced, accurate manner, extending low frequencies of the main speakers naturally and seamlessly down to 26Hz (+/-6dB). In Movie mode there will be additional "slam" on offer to aid explosive movie soundtracks in AV systems. Finally Impact mode trades outright extension for maximum volume and serious impact, more akin to a club set-up for when you really want to party hard!

The 308 is available in attractive real wood American walnut veneer, piano gloss black or white lacquer to match the other 300 Series models and has sturdy carpet-piercing spikes which come with convenient rubber caps for use on hard flooring.

AE308 Specifications

- Type: Sealed box, downward firing driver
- Drive unit: 12" High-excursion doped and stiffened paper cone
- Frequency response: 26Hz-120Hz +/- 6dB
- Inputs: Low level stereo RCA, High level stereo binding posts, LFE RCA
- Power output: 500 Watts RMS
- Crossover frequency: 40-120Hz rotary control
- Phase: 0-180 degrees rotary control
- Amplifier type: Class D
- Mains input voltage: 115-240 volts switchable
- Dimensions: 360 x 360 x 360mm (HxWxD)
- Net weight: 16.5kg
- Finishes: Piano Gloss Black, Piano Gloss White and real Walnut wood veneer
